

PETRA

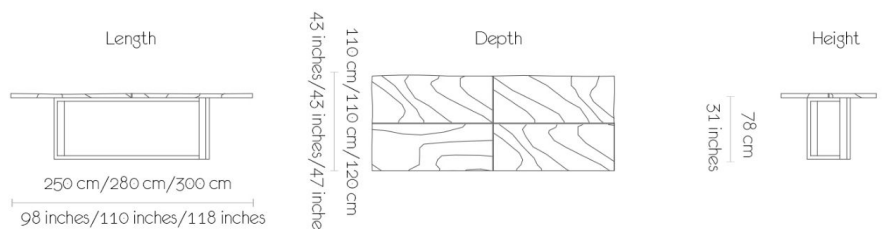

Dining table Ref.: PETRA DTS / PETRA DTM / PETRA DTL

In Greek mythology, Medusa could turn her beholder into stone just by a look. For wood, this process takes millions of years resulting in a breathtaking beautiful dense material. Buried in the soil, the enclosure of metals and minerals during this natural transformation give each piece a unique set of colors and veins. Combined with the strong yet elegant metal base this unique material formed by nature is transformed into a luxurious contemporary dining table.

Designed by Architect Fernan Hernandez | *Hand-crafted in Italy.*

Petrified Wood: White, Grey, Black.
Metal: Inox, Canna Di fucile, Rame, Oro, Bronze Shadow and Ottone Anticato.

As shown | Petrified Wood: White and black Metal: Oro Satinato
Available in other dimensions and materials upon request.

*Available in three different dimensions.
